Comenius in-service training course for teachers and administrators

What?

The main objective of the course is to become familiar with the best practices in immigrants' education and to implement these into one's own work.

Participants will receive an insight into migrants' education in Finland and will compare this with other countries' education practices, policies and systems.

Participants will receive an understanding of how Finland, as the number one PISA country, takes care of immigrants in compulsory education.

The course theme will be explored in keynotes and workshops, relevant material will be presented, expertise will be exchanged, and good practice will be highlighted. The course will also be ideal for networking and creating useful contacts e.g. for the exchange of best practice and for possible future Comenius projects.
